What is IMU’s Nursing Programme About?

OVERVIEW

The Nursing degree is a 4-year full-time programme which prepares a student to become a registered nurse, qualified to practise in a variety of settings in either the public or private healthcare sectors.

Students are provided with opportunities to learn a whole range of nursing skills in addition to acquiring knowledge related to nursing practice. To that end, IMU has an integrated Clinical Skills and Simulation Centre (CSSC) which simulates clinical environment ward setting. Here, students can obtain the requisite nursing skills before their clinical postings.

In addition, students gain clinical experience through attachments at public and private hospitals and postings in community health centres.

Students are supervised and guided by nurse educators from IMU and health practitioners from the public and private sectors.

A Word from the Programme Director

Caring remains the essence of nursing. It is the caring behaviour and practices that distinguish nursing from other professions. The IMU Nursing degree programme has been planned to prepare a person to become a registered nurse and to be able to practise his or her profession in a variety of settings — in the public or private sector healthcare system as well as in other health-related industries.

RADHA MANIAM
Lecturer and Programme Director

The curriculum is reviewed periodically and is subject to change.

The MPU modules are compulsory modules imposed by Ministry of Higher Education under the Private Higher Educational Institutions Act 1996 (Act 555).

All students must take these modules and pass as a prerequisite for the award of the degree.
ASSESSMENT
Students will be assessed through various assessment methods i.e. class tests, quizzes, written tests / examinations, practical reports, practical assessment, assignments, Objective Structured Clinical Examination (OSCE), projects, portfolios, reflective journals, clinical assessment presentation, case studies, classroom and client teaching assessment.

RECOGNITION OF DEGREE
Many countries require nurses to have a degree as the entry level into the nursing profession. Nurses with a degree are able to secure a high position in their workplace in Malaysia. IMU’s Nursing degree is recognised in Malaysia and overseas.

The IMU Nursing graduates are employed in different parts of the world. Some of the graduates are working in Qatar, Saudi Arabia and Singapore and in different healthcare institutions and private companies in Malaysia.

A number of graduates from IMU are pursuing their postgraduate degree overseas in the United States of America, the United Kingdom, Singapore and Japan, and locally in Malaysia.

CAREER PATHWAY
Nursing is the promotion and optimisation of health and abilities of individuals, prevention of illness and injury, alleviation of suffering through the diagnosis and treatment of human response and advocacy in the care of individuals, families, communities, and populations. It involves assisting the individual, sick or well, in the performance of those activities contributing to health or its recovery. Nursing is the caring behaviour and practices that distinguish nursing from other professions.

A Nursing graduate registered with the Nursing Board Malaysia receives high recognition locally and overseas. There is a great demand for nurses in Malaysia and in other countries hence more nurses need to be trained to cater for the shortage of nurses globally.

After graduating with a bachelor’s degree in Nursing, the graduate can choose to work as a registered nurse or pursue advanced diploma or post basic specialisation in maternity, orthopaedic, critical care nursing, renal nursing, perioperative nursing, community nursing, gerontology nursing and more. Graduates can also choose to further their studies at the master’s and doctoral (PhD) level.

FINANCIAL AID
Sponsorships from local hospitals and hospitals in Singapore are available for eligible students. For more information, please refer to the University.

Why Study Nursing at IMU?

1. **An Established Private Healthcare University**
   IMU is Malaysia’s first and most established private medical and healthcare university with over 28 years of dedicated focus in healthcare education. IMU achieved the SETARA-2017 Tier 6 status (Outstanding) under the Mature University category.

2. **Build Your Future Healthcare Professional Network**
   As IMU offers the widest range of healthcare programmes, our students are fully immersed in a vibrant community of students and practitioners from all healthcare fields. This allows for the development of strong friendship amongst peers that will be the foundation of an extensive healthcare professional network upon graduation.

3. **Curriculum Benchmarked to International Standards**
   IMU’s Nursing curriculum has been developed and delivered by well-qualified and experienced faculty to meet high international standards and global needs.

4. **Better Preparation for Patient Care**
   With clinical exposure in both private and public hospitals and agencies, graduates are better prepared to deliver safe and effective care to the community in a variety of healthcare agencies.

5. **Opportunities to Work Overseas**
   With a high demand for nurses worldwide, graduates of our Nursing programme would have an advantage in finding a job once they are registered with the Nursing Board Malaysia.
Learn from Our Experienced Lecturers

**DR LIM SWEE GEEK**
Senior Lecturer, Head of Nursing Division
PhD (UM), MEd (UM), Neonatal Nursing (MOH), BN (UniSA), Certificate in Teaching Methodology (UniSA), RN

Lim Swee Geok obtained her Masters in Education in 2007 (University of Malaya) and has just completed her PhD (University of Malaya). She has been in the Nursing profession since 1990 with 17 years of experience in Nursing Education. At present, she is the Head of Nursing Division, School of Health Sciences. Her area of specialty is in the area of Neonatal Nursing. Other than teaching, she is also involved in the research supervision of undergraduate students. Her areas of interest in research include quality related studies and neonatal nursing. Lim Swee Geok has several research publications and had presented her research findings at both local and international conferences.

**CHANG WOAN CHING**
Lecturer
MNSc (OUM), BNSc (Monash), Adv Dip in Critical Care Nursing (UM), RN (Assunta), Certificate in Teaching (IMU)

Chang Woan Ching obtained her Masters of Nursing in 2014 from Open University Malaysia. Currently, she is pursuing her PhD at Asia e-University, Malaysia. She has been in the healthcare industry for the past 13 years and nursing education for 9 years. Her area of specialty is in the area of critical care nursing. Other than her teaching role, she is also involved in the research supervision of undergraduate students. Her areas of interest in research include nursing clinical practice and nursing technology-based education. Chang has presented her research work in various local and international conferences. She obtained several awards including the Sijil Merit Sempena Virus Nipah (UMMC), the best Nursing Faculty Award (IMU) and the best Leadership Community Cares Award (IMU).

**RADHA MANIAM**
Lecturer
MNSc (UM), BNSc, (UM) Renal Nursing (MOH), RN (MOH)

Radha Maniam obtained her Masters in Nursing Science in 2012 and Bachelor of Nursing Sciences in 2002 from University Malaya. Currently, she is pursuing her PhD at University Malaya. She has been in the healthcare industry for the past 27 years and nursing education for 16 years. Her area of specialty is in the area of renal nursing. Other than teaching, she is also involved in the research supervision of undergraduate students. Her areas of interest in research include nursing clinical practice and end of life care. Radha has several research publications and has presented her research work in various local and international conferences. She has been invited as speaker for international conference, workshops and seminars. She obtained several awards including the Sijil Perkhidmatan Cemerlang in 1999 (Staff-nurse; KKM) and Sijil Perkhidmatan Cemerlang in 2007 (Educator; UKM).

**MADAM TAN SEEW GEEK**
Lecturer
Master of Nursing Science (UM), BSc (Hons) Nursing (Hudderfield)

Tan Seew Geek obtained her Masters in Nursing from University of Malaya, and Post Basics in Midwifery, Paediatric and Renal Nursing with distinctions. A nurse by profession, she has 38 years of working experience in the Ministry of Health, Malaysia and 2 years as a Nursing Educator in the private sector. She had a good track record of 16 years as excellent Nurse Manager (Sister) / Nurse Administrator at busy healthcare settings. Tan Seew Geek was trained as a Lean Health Care Champion and collaborated with Lean Health Care team, Hospital Kuala Lumpur in achieving innovations such as Bed Management, Specimen Labels System and Outpatient Appointment System in medical wards. Other than teaching, she is also involved in the research supervision of undergraduate students and has presented papers at National and international levels.
Nursing

Why Study

With a high demand for nurses worldwide, graduates of our Nursing programme are better prepared to deliver safe and effective care to the community in a variety of settings.

Better Preparation for Patient Care

IMU’s Nursing curriculum has been developed and delivered by well-qualified faculty who have extensive experience in their fields. This allows for the development of strong relationships amongst peers that will continue throughout their careers. As IMU offers the widest range of healthcare programmes, our students are fully immersed in a vibrant community of students and practitioners from all healthcare disciplines.

An Established Private Healthcare University

IMU is Malaysia’s first and most established private medical and healthcare university, with over 28 years of dedicated focus in healthcare education. IMU achieved the Virus Nipah (UMMC), the best Nursing Faculty Award (IMU) and other awards for technology-based education. Chang has presented her research at numerous conferences, workshops, and seminars. She has been invited as a speaker at various events.

Lim Swee Geok obtained her Masters in Education in 2007 (University of Malaya) and has just completed her PhD in Critical Care Nursing. Lim Swee Geok has several research publications and presentations at National and international levels. Her areas of interest in research include quality related studies and end of life care.

Radha Maniam obtained her Masters in Nursing Science in 2012 and Bachelor of Nursing Sciences in 2002 from University Malaya. Currently, she is pursuing her PhD at University Malaya. She is the Head of Nursing Division, School of Health Sciences. Her area of specialty is in the area of renal nursing. Other than teaching, she is also involved in the research supervision of undergraduate students. Her areas of interest in research include nursing clinical practice, critical care, nursing education for 16 years. Her area of specialty is in the area of critical care nursing. Other than her teaching role, she is also involved in the research supervision of undergraduate students. Her areas of interest in research include nursing clinical practice, critical care, nursing education for 16 years. Her area of specialty is in the area of critical care nursing.

What Our Students Say

“Four years training in IMU had given me enough preparation to work in any area of nursing in the healthcare system. The modules that has been prepared and delivered gave me the opportunity to learn not only in nursing care but also in different points of view. This is very useful for me especially working in an emergency department of a private hospital where patients come from different parts of the world.” — Maslina Yusak Alumna

“At the end of each semester, we had our clinical posting which gave us the experiences in various disciplines such as A&E, ICU, O&G and etc. I could proudly say that nurses who graduated from IMU have been fully equipped with the essence of nursing while caring for our patients holistically. We have learned not only to perform nursing skills, but to treat our patients as a “whole” physically, mentally, emotionally and spiritually.” — Chong Mei Sin Alumna

“The lecturers were motivated to teach and always ready to help the students when they needed it. The programme has helped to mold and develop me to work under pressure in challenging work settings. The campus was a great place to learn and the university was always vibrant with various student activities and workshops which created a stimulating environment for learning.” — Jessica Preeti Joseph Alumna
### How Much Does It Cost?

**NURSING PROGRAMME FEES**

All fees quoted are in Ringgit Malaysia unless stated otherwise.
