PARTNER MEDICAL SCHOOLS IN THE
INTERNATIONAL MEDICAL CONSORTIUM

History of the IMU

The International Medical University (IMU) started as an exciting venture in medical education in 1991. A team of academicians led by Datuk Dr Kamal Salih, Dr Mei Ling Young, the late Dr Saidi Hashim with the help of Professor Ron Harden and Professor Ian Hart, two world-renowned medical educationists, conceptualised the International Medical College (IMC). Professor Ong Kok Hai joined the team later. This was a unique educational venture established in line with the Malaysian government's objective of making the country a leading centre of educational excellence in the region and providing more Malaysian students the opportunity to achieve their aspirations to become doctors and healthcare professionals.

Datuk Dr Kamal Salih

Dr Mei Ling Young

The Late Dr Saidi Hashim

The calibre of the medical educationists and the reputation of the Board of Governors initially helped lend credibility to the project. But it was the progressive, systems based, and integrated medical curriculum that caught the imagination of the Partner Medical Schools (PMS), which wanted to participate in this innovative although somewhat daring project. After 2½ years of study in the IMC, students would be able to springboard to any of the reputable PMS in the United Kingdom and Ireland, New Zealand, Canada, the United States and Australia and receive the degree from the respective university.

The College was officially launched on 13 April 1992 by the then Malaysia's Education Minister, YB Datuk Amar Dr Sulaiman Haji Daud in Kuala Lumpur.

This was a pioneering effort involving a private medical training institution representing a totally new and innovative concept of

international partnership for the twenty-first century. The IMC had the full support of the Ministry of Education and Ministry of Health. The institution also had the support of experienced and reputable members of the Board of Governors and members of the Academic Council which consisted of the Deans or their representatives from all the PMS which met at least once a year. With the help of Professor Ron Harden and Professor Ian Hart, an international search for the Foundation Dean started in 1992. An eminent Professor of Pathology, Emeritus Professor John S Beck from the University of Dundee was appointed the Foundation Dean of the IMC. Sir Patrick Forrest, Emeritus Professor of Surgery from the University of Edinburgh joined as the Associate Dean later. In 1993, the IMC took in its pioneer batch of 75 medical students.

In 1996, after the medical curriculum had run its full course and consolidated, the IMC felt it was timely to start a collaborative pharmacy programme with the University of Strathclyde, in response to the acute need of pharmacists in Malaysia. In 1998, the pioneer class of medical and pharmacy students graduated from the Partner Universities.

On 4 February 1999, the IMC was granted university status and became the International Medical University (IMU), thus providing an additional option for students to read the whole medical degree in Malaysia, the MBBS (IMU). The IMU Clinical School in Seremban took in its first cohort of 46 students in September 1999. The late YABhg Tun Dr Mohamed Zahir Haji Ismail, Speaker of the House of Representatives became IMU's first Chancellor.

As the student population grew, the IMU moved from its campus in Petaling Jaya to a new and larger campus in Bukit Jalil on 1 January 2000. More PMS, particularly in Australasia and the United Kingdom then joined our consortium. Having established a reputation as a premier private medical university with high calibre international connections, the IMU strives to innovate in medically-related education by developing novel curricula, new ways of delivery and assessment.

Since 1999, the University's growth and development has been in developing clinical schools in Seremban and Batu Pahat, and in establishing research as a core activity, together with development of postgraduate research Masters and PhD programmes.

In 2004, we introduced our own Honours degree course in Pharmacy. The Honours degree course in Nursing was introduced in 2005. In February 2008, the degree course in Dentistry was introduced. Five other Honours degree courses in Nutrition & Dietetics, Medical Biotechnology, Psychology, Biomedical Science and in Pharmaceutical Chemistry commenced in July 2008. In 2009, we introduced a new programme Bachelor of Nursing Science (Hons), a programme targeted solely for registered nurses to upgrade their qualification from diploma level to a degree level. In 2010, the IMU will be introducing programmes in Chiropractic and Chinese Medicine as part of our commitment to meet the needs of healthcare professionals in our region.

To remain the premier private medical university, the IMU must develop quality programmes and services of an international standard.

The mace is the symbol of authority of the International Medical University (IMU). The globe at the top symbolises the international nature of the University. Gold denotes the quality of education provided by the IMU. The seven kris (traditional Malay weapon) represent the nations participating in the International Medical Consortium. The songket motif symbolises the country's cultural tradition. The bunga raya (hibiscus) is Malaysia's national flower. The five facets of the mace signify the five continents of the world.

The University Mace

The second ring consists of the logo of the IMU to signify its new charter as a University. Below the second ring of the mace are the logos of the original five Partner Medical Schools which helped start this innovative medical programme.

The original International Medical College emblems are etched on each side of the brace in the third ring of the mace. Below the third ring are the logos of the international Partner Universities involved through their medical schools in the International Medical Consortium. The bottom part of the mace is carved in the shape of the Kelantanese gasing (spinning top), another symbol of Malaysian culture.

IMU Vision

IMU shall be an innovative global centre of excellence in learning and research, supporting a community of scholars and professionals committed to serving society, promoting the development of students to reach their true potential in becoming competent, ethical, caring and inquiring citizens and visionary leaders.

IMU is committed to academic freedom and the principles of equal opportunity in the pursuit and application of knowledge, the highest standards of intellectual, educational and research productivity, and the establishment of a learning organisation that respects the individual.

IMU ~ A Unique International Vision

IMU offers a unique global opportunity for medicine and health sciences professional education. The pre-clinical course delivered in IMU, Kuala Lumpur leads into the clinical course offered at IMU and 30 partner International Research-intensive Universities. The quality of these universities assures the standing of the curriculum in IMU through the Academic Council.

IMU Quality Policy

The International Medical University aims to be an innovative centre of excellence in learning and research, producing competent, caring and ethical professionals who are lifelong learners. It is committed to achieving the highest standards of intellectual, educational and research productivity.

Together, Learning for Health

The Logo

The initials IMU represent the name of the University. The strips on the "I" represent the three pillars of Innovation, Imagination and Insight. The snake and staff are the traditional symbols for medicine, which is the educational focus of the University. The colour white represents integrity. The globe stands for international connections: the IMU as a member of the International Medical Consortium, both in terms of partnerships with many well-known foreign universities, as well as its international faculty and student body. The tilted square represents the mortarboard, which is the symbol of academia

in relation to the community. The colour blue, in its two shades, stands for peace and harmony.

The Motto

"Together, Learning for Health" is the IMU motto. The search for knowledge is a lifelong process. With the explosion in information, the growth of enabling technologies such as Information and Communications Technology and the globalisation of education, learning and discovery increasingly involve the sharing of resources and knowledge amongst communities of practice.

Message from the President

Graduation is one of the most important milestones of a person's life. It is the culmination of many years of hard work and is a pivotal occasion representing the end of one step and the beginning of a new phase in a person's lives. In this phase, this person will likely come across enormous challenges, and must be able to muster the courage to overcome them.

Graduates, during your years of study here, many friendships have been nurtured. They are the friends who have shared with you the same experiences during your years of study, the difficult times in study, the endless cups of coffee sipped, and whom you have shared your hopes and disappointments. These friends together with your family who has given you support during your years of study will be very proud of you today.

On this special occasion, YABhg Tun Dr Mahathir Mohamad will be conferred the IMU Honorary Doctorate in recognition of his visionary leadership, his enormous and invaluable contributions to the country. YABhg Tun was the fourth Prime Minister of Malaysia from 16 July 1981 to 31 October 2003, making him the longest-serving Prime Minister, and one of the longest-serving leaders in Asia. YABhg Tun received his MBBS degree from the University of Malaya in 1953 and immediately began his housemanship at the Penang General Hospital which he completed the following year. Tun Dr Mahathir then served the government as a Medical Officer in Alor Setar, Langkawi and Perlis. In June 1957, Tun Dr Mahathir left government service to enter private practice, and politics. He has been acknowledged to be the father of development of modern Malaysia. His leadership has brought Malaysia on to the world stage, and made Malaysia to be widely known around the world. After retirement as Prime Minister, he continues his role as a Statesman whose views are much sought after around the world.

I am proud to announce that recently, the four-year Master of Pharmacy (MPharm) degree has been fully accredited for five years by the Royal Pharmaceutical Society of Great Britain (RPSGB). Students who are studying for this degree spend two years of study at IMU and then transfer to the University of Strathclyde, Scotland for another two years. The accreditation by RPSGB means that following the successful completion of a pre-registration training year, graduates will be able to practise as pharmacists within the UK. For this accreditation, a series of three visits were made by panel members of the accreditation team to IMU's campus in Bukit Jalil. The visits

were for an extensive investigation of the delivery of IMU's MPharm programme, its facilities and its mechanisms for quality assurance. This is the most important confirmation of our academic standards and quality as well as our commitment to the development of teaching and learning.

Congratulations to all the returning medical and pharmacy graduates who have completed their studies in the Partner Universities overseas. The pharmacy students who have transferred to University of Strathclyde have done extremely well. This year, IMU students won four prizes at the University of Strathclyde: the Principal's Prize, the James Taylor Prize, the Organon Laboratories Prize and the Suresh Madhok Prize. Jason Loo Siau Ee was awarded the Principal's Prize for the best overall performance in the collaborative MPharm degree and the Organon Laboratories Prize for a distinguished student in pharmacology in the final year of the MPharm course. Yean Yi Lyn was awarded the James Taylor Prize for a distinguished student in the final year of the MPharm course

while Tan Yong Pei was awarded the Suresh Madhok Prize for achievement by a student in the final year of the MPharm course.

Graduates, as you leave the nest to enter a world full of opportunities, take with you the values and traditions of your alma mater. Caring for others, lifelong learning, and leadership are elements of your future. The degree you receive today is the key to many career opportunities. Whatever plans you have, or will make for your future, I am confident that your studies at the IMU have given you the necessary skills to do well. However, do not limit yourself to the qualification which you now carry. In a world of constant change, you need to embrace a positive attitude towards learning. Learning is a treasure that will follow its owner everywhere.

Congratulations on your achievements, on work well done and completing your degrees. We wish all of you good health, a meaningful career, and phenomenal success in your future.

Citation

Consider a man who is a statesman and a symbol. A man who exemplifies the many facets of modernism. A man with a quest for knowledge and high ideals. A man who has shaped the destiny of our nation. A man respected by all leaders across the globe as the voice of tomorrow.

Born in Alor Setar, Kedah, Tun Mahathir rose from modest beginnings to reflect very early in life a vibrant personality. His father, Mohamad bin Iskandar, a headmaster, nurtured his love for reading and kindled the flame of diligence in young 'Che Det' as he was fondly known, to strive for success and greater achievements. Tun Mahathir's mother, Wan Tempawan binti Wan Hanafi doted on him, as he was the youngest of her nine children.

Tun Mahathir, from the beginning of his education, sought to be an all rounder by being an editor, rugby player and outstanding debater. When his education was halted during the Japanese war, he turned his attention to entrepreneurship skills by experimenting with small business. These real life experiences made him a more determined man to raise the standard of living of the Malays, thus diverting his attention to politics. However, he knew that to win the confidence of his people, he had to be an outstanding role model in education and leadership.

After the war, he continued his studies and won a scholarship to study medicine at King Edward VII Medical College in Singapore, later known as the University of Malaya. Like any other university student, Tun Mahathir was ragged; he had his pockets filled with small body parts and was denied the comfort of sleeping on his bed, having to endure the cold, hard cement below his senior's bed. And of course,

it was in the corridors of the college that he first laid eyes on the love of his life, Tun Dr Siti Hasmah binti Mohd Ali. Their courtship amidst lovers' quarrels, lecture notes and perhaps rides in his Triumph Mayflower culminated in marriage in 1956.

Upon graduation, he served in the Penang General Hospital and then as a Medical Officer in Kedah, Perlis and Langkawi. He then ventured into opening the first private Malay clinic, the MAHA Clinic, in his hometown, Alor Setar, which continues to offer services till today.

Tun Mahathir epitomises a man who believes in himself and transferred that belief to lead the nation for 22 years. As a visionary leader, he is a man of innovation, imagination and insight. Indeed – the very three 'i's that IMU espouses.

A man of Innovation, he was conscious of his people, the soul of the nation and opened the doors to better prospects by being creative.

Tun was resolute and steadfast in undertaking the shaping of our nation; the milestones of his leadership saw the implementation of bold policies in the plans and performance of Malaysia's economy, propelling the nation to rise to the level of a newly developed country.

His innovations such as the setting up of the Heavy Industry Corporation Malaysia (HICOM), which developed the cement, steel and car manufacturing industries has not only created growth in our economy but their linkages cascaded to other support industries in Malaysia.

Other innovations include the Multimedia Super Corridor, the enactment of cyberlaws, the development of a Malaysian aerospace industry and creating an aviation hub at Kuala Lumpur International Airport. In many ways, he was a man ahead of his time.

Tun had the foresight to make Malaysia an educational hub, as seen in the flowering of private education since the 1990's – an initiative to be emulated by other countries. He gave access to education to all levels of Malaysians helping with the anticipated looming problem of human resource. Today, we can boast that this endeavour has not only produced many internationally benchmarked institutions and courses, but private education at present, has as many students at the tertiary level as that of the public sector.

A man of Imagination and vision, a man recognised as the Father of Modern Malaysia, the fourth Prime Minister of Malaysia – Tun Dr Mahathir conceptualised Vision 2020 which calls for a self-sufficient industrial, Malaysian-centric developed nation by the year 2020.

He broke away from traditional ideas, and rationalised the future of our nation, not forsaking human values for the cold ethos of science and technology. Malaysia's Vision 2020 is not only confined to economic development but encompasses the political, social, spiritual, psychological and cultural domains as well.

Drawing from civilisations and histories of great cultures including the Islamic world, in all its diversity, he traversed into a modernity that far exceeded the imagination and yet remains familiar. Two distinctive landmarks; the iconic Petronas Twin Towers, which has put Malaysia on the world map and Putrajaya captured the genius of this imagination as seen in the harmony between futuristic technology and Islamic architecture.

A man of Insight, with a curious and fearless mindset he challenged hardships and never once withdrew from goals he set out to fulfill.

Tun had a depth of understanding, an intuitive grasp of things and an acute perception of a situation, all of which resulted in our nation evolving from dependence on export of raw commodities to industrialisation and from manufacturing to services.

He knew that knowledge is power and strived to transform our nation to a knowledge-based economy and to convince Malaysians from all walks of life to be proactive in creating new value. Tun said, "Knowledge has always been important. The ancient Egyptians did not raise the stones for the pyramids relying on the incantations to their Gods. The waters in the irrigation canals of the great Indus civilisation did not flow according to the laws of ignorance." He

had the conviction to lay the path for many bumiputras to leave the periphery, to become the pillars of society in entrepreneurship and hold professional jobs.

A Man with a Physician's Heart

Conscientious and meticulous in all his dealings, he portrayed a physician's aptitude and attitude in his leadership. Like a physician who looks into the history of his patient, Tun himself said, "To forecast the future we have to look into the past. Not only will the past influence the future but also what happens in the past will help indicate the possible trend of events in the future."

He has the gift of listening attentively, having patience and being passionate in commitment. And above all Tun has humility, a virtue that he singled out saying, "We must always be humble. Humility and reality tell us our journey is far from complete." He treated all his patients equally, regardless of rank. He never thought it beyond himself to travel into the interior to visit the poor and sick, treating all with dignity and compassion.

Indeed, innovation, imagination and insight: an amalgamation of old and new, art and science, logic and intuition have combined to create a truly remarkable man.

Here is a man whose vision the poet William Blake encapsulated.

To see a world in a grain of sand
And a heaven in a wild flower
Hold infinity in the palm of your hand
And eternity in an hour

For the legendary work he has conceived and brought to fruition, for the dynamic transformation he has led us into, and for awakening the everlasting strength to say "Malaysia Boleh", the International Medical University is not only privileged but greatly honoured to bestow upon Yang Amat Berbahagia Tun Dr Mahathir bin Mohamad the Honorary Doctor of Medicine.
