A PARTNER OF THE WORLD'S PRESTIGIOUS
UNIVERSITIES

History of the IMU

The International Medical University (IMU) started as an exciting venture in medical education in 1991. A team of academicians led by Datuk Dr Kamal Salih, Dr Mei Ling Young, the late Dr Saidi Hashim with the help of Professor Ron Harden and Professor Ian Hart, two world-renowned medical educationists, conceptualised the International Medical College (IMC). Professor Ong Kok Hai joined the team later. This was a unique educational venture established in line with the Malaysian government's objective of making the country a leading centre of educational excellence in the region and providing more Malaysian students the opportunity to achieve their aspirations to become doctors and healthcare professionals.

Datuk Dr Kamal Salih

Dr Mei Ling Young

The Late Dr Saidi Hashim

The calibre of the medical educationists and the reputation of the Board of Governors initially helped lend credibility to the project. But it was the progressive, systems based, and integrated medical curriculum that caught the imagination of the Partner Medical Schools (PMS), which wanted to participate in this innovative although somewhat daring project. After 2½ years of study in the IMC, students would be able to springboard to any of the reputable PMS in the United Kingdom and Ireland, New Zealand, Canada, the United States and Australia and receive the degree from the respective university.

The College was officially launched on 13 April 1992 by the then Malaysia's Education Minister, YB Datuk Amar Dr Sulaiman Haji Daud in Kuala Lumpur.

This was a pioneering effort involving a private medical training institution representing a totally new and innovative concept of

international partnership for the twenty-first century. The IMC had the full support of the Ministry of Education and Ministry of Health. The institution also had the support of experienced and reputable members of the Board of Governors and members of the Academic Council which consisted of the Deans or their representatives from all the PMS which met at least once a year. With the help of Professor Ron Harden and Professor Ian Hart, an international search for the Foundation Dean started in 1992. An eminent Professor of Pathology, Emeritus Professor John S Beck from the University of Dundee was appointed the Foundation Dean of the IMC. Sir Patrick Forrest, Emeritus Professor of Surgery from the University of Edinburgh joined as the Associate Dean later. In 1993, the IMC took in its pioneer batch of 75 medical students.

In 1996, after the medical curriculum had run its full course and consolidated, the IMC felt it was timely to start a collaborative pharmacy programme with the University of Strathclyde, in response to the acute need of pharmacists in Malaysia. In 1998, the pioneer class of medical and pharmacy students graduated from the Partner Universities.

On 4 February 1999, the IMC was granted university status and became the International Medical University (IMU), thus providing an additional option for students to read the whole medical degree in Malaysia, the MBBS (IMU). The IMU Clinical School in Seremban took in its first cohort of 46 students in September 1999. The late YABhg Tun Dr Mohamed Zahir Haji Ismail, Speaker of the House of Representatives became IMU's first Chancellor.

As the student population grew, the IMU moved from its campus in Petaling Jaya to a new and larger campus in Bukit Jalil on 1 January 2000. More PMS, particularly in Australasia and the United Kingdom then joined our consortium. Having established a reputation as a premier private medical university with high calibre international connections, the IMU strives to innovate in medically-related education by developing novel curricula, new ways of delivery and assessment.

Since 1999, the University's growth and development has been in developing clinical schools in Seremban and Batu Pahat, and in establishing research as a core activity, together with development of postgraduate research Masters and PhD programmes. In 2004, we introduced our own Honours degree course in Pharmacy. The Honours

degree course in Nursing was introduced in 2005. In February 2008, the degree course in Dentistry was introduced. Five other Honours degree courses in Nutrition & Dietetics, Medical Biotechnology, Psychology, Biomedical Science and in Pharmaceutical Chemistry commenced in July 2008.

Bachelor of Nursing Science (Hons) was introduced in 2009, a programme targeted solely for registered nurses to upgrade their qualification from diploma level to a degree level. In 2010, we introduced the Chiropractic programme, the first of its kind and only complete educational programme in Malaysia as well as in all of Southeast Asia. In addition, the Chinese Medicine programme will be launched in February 2011. We believe our courses to be progressive and innovative, and we strive to use best practice in their delivery and assessment.

To remain the premier private medical university, the IMU must develop quality programmes and services of an international standards.

The mace is the symbol of authority of the International Medical University (IMU). The globe at the top symbolises the international nature of the University. Gold denotes the quality of education provided by the IMU. The seven kris (traditional Malay weapon) represent the nations participating in the International Medical Consortium. The songket motif symbolises the country's cultural tradition. The bunga raya (hibiscus) is Malaysia's national flower. The five facets of the mace signify the five continents of the world.

The University Mace

The second ring consists of the logo of the IMU to signify its new charter as a University. Below the second ring of the mace are the logos of the original five Partner Medical Schools which helped start this innovative medical programme.

The original International Medical College emblems are etched on each side of the brace in the third ring of the mace. Below the third ring are the logos of the international Partner Universities involved through their medical schools in the International Medical Consortium. The bottom part of the mace is carved in the shape of the Kelantanese gasing (spinning top), another symbol of Malaysian culture.

IMU Vision

IMU shall be an innovative global centre of excellence in learning and research, supporting a community of scholars and professionals committed to serving society, promoting the development of students to reach their true potential in becoming competent, ethical, caring and inquiring citizens and visionary leaders.

IMU is committed to academic freedom and the principles of equal opportunity in the pursuit and application of knowledge, the highest standards of intellectual, educational and research productivity, and the establishment of a learning organisation that respects the individual.

IMU ~ A Unique International Vision

IMU offers a unique global opportunity for medicine and health sciences professional education. The pre-clinical course delivered in IMU, Kuala Lumpur leads into the clinical course offered at IMU and 30 partner International Research-intensive Universities. The quality of these universities assures the standing of the curriculum in IMU through the Academic Council.

IMU Quality Policy

The International Medical University aims to be an innovative centre of excellence in learning and research, producing competent, caring and ethical professionals who are lifelong learners. It is committed to achieving the highest standards of intellectual, educational and research productivity.

Together, Learning for Health

The Logo

The initials IMU represent the name of the University. The strips on the “I” represent the three pillars of Innovation, Imagination and Insight. The snake and staff are the traditional symbols for medicine, which is the educational focus of the University. The colour white represents integrity. The globe stands for international connections: the IMU as a member of the International Medical Consortium, both in terms of partnerships with many well-known foreign universities, as well as its international faculty and student body. The tilted square represents the mortar-board, which is the symbol of academia in relation to the community. The colour blue, in its two shades, stands for peace and harmony.

The Motto

“*Together, Learning for Health*” is the IMU motto. The search for knowledge is a lifelong process. With the explosion in information, the growth of enabling technologies such as Information and Communications Technology and the globalisation of education, learning and discovery increasingly involve the sharing of resources and knowledge amongst communities of practice.

Message from the President

Convocation ceremonies are auspicious occasions when the University celebrates the academic achievements of young scholars. It is a celebration of the culmination of many years of hard work, concerted effort and achievement in completing a demanding and rigorous course of study.

Graduates, on behalf of the International Medical University, I wish to extend my most heartfelt and warmest congratulations to you. You should be proud of this important milestone in your life, as should all who have given you support during your years of study. This is also a day of reflection on what lies ahead.

While every year is eventful, this year seemed to have more than its share of uncertainty and challenges. The consequences and impact of issues such as concern over the H1N1 flu virus and other events have affected us as individuals and collectively at the University. Such events are a powerful reminder that we, as a campus community, share a common purpose and that the ability of the institution to meet such challenges depends on the strength and resiliency of its students, staff and faculty.

Of course, we also had much to be proud of. It is with pride that I announce the recent full accreditation of the IMU Bachelor of Pharmacy (Hons) programme and the IMU Bachelor of Nursing (Hons) programme for a period of five years.

Most memorably, the university celebrated ten years of continuous success of its clinical school and MBBS programme. The 10th Anniversary celebrations were marked in a variety of events which included exhibitions, sporting events, cultural events as well as health screening and awareness campaigns from 5 to 10 October 2009. The celebrations reached its apex at a dinner and performance show on the night of 10 October. Although the dinner formally marks the end of our 10th year anniversary celebrations, I know that we will begin the next ten years and beyond with a renewed sense of pride and appreciation without resting too comfortably upon our laurels.

Plans for a major review for the medical curriculum are currently underway. An interactive forum was held on 5 December 2009 to engage major stakeholders in a discussion on the expected qualities of Malaysia's Doctor of Tomorrow. The panel consisted of opinion leaders and administrators in the medical profession as well as representatives from the medical student population and the general public. The outcome of the discussion will be taken into account when the IMU begins a series of workshops to review the medical curriculum.

Medical students in IMU now have the opportunity to be trained in an additional teaching hospital with the launching of Hospital Tuanku Ampuan Najihah, Kuala Pilah as IMU's teaching hospital on 2 March 2010. This hospital would provide appropriate clinical settings for IMU's medical students to be trained while the Ministry of Health clinicians at the hospital would be involved in the teaching and learning of these students besides ensuring that quality health service is continuously given to its patients.

In February this year, this university welcomed its first intake of 30 students for its undergraduate chiropractic degree programme. This is the first and only complete chiropractic educational programme in Malaysia, as well as in all of Southeast Asia. It is hoped that with the addition of this programme, the university will be able to contribute to the much needed growth of the chiropractic profession in Malaysia.

We are also proud of a group of nine nursing graduates, the university's pioneer batch of nursing graduates, who have passed their Malaysian Nursing Board Examination once again demonstrating the high quality of nursing education provided at IMU. This entitles them to licensure in order to practice as registered nurses in Malaysia.

Teamwork and smart partnerships between universities and industries are fundamental to sustainable success in today's challenging global economic climate, both from the scientific as well as commercial aspects. Such partnerships with industries will also allow our students and faculty to gain from their industrial experience. To this end, I am

pleased to state that IMU has signed a number of Memorandum of Understandings with many of the country's key industrial players in the areas of clinical pathology, nutrition and dietetics, pharmaceutical manufacturing, retail pharmacy and biotechnology.

Graduates, it has been a privilege and a pleasure to host you during your academic career. During these many years that you have spent with the University, I am sure your academic and intellectual faculties as also the inherent talent have bloomed. You are now well-prepared and have what it takes to meet whatever challenges that are waiting for you. Your education is a permanent and enriching feature of your life. It is also an important source of lifelong personal and professional growth. Armed with an education from IMU, you can confidently march into the next phase of life where a diversity of challenges await you.

This is not the end of the journey, it is only the beginning. Today you stand at an important threshold; a new beginning on an uncharted course in your life. Now, you are looking forward to taking on new challenges, your mind is probably now consumed by all of the things that will be changing in your life in the coming weeks, months and years. This is the time to look forward to the next chapter of your life.

Graduates, we live in a society that now demands that we constantly update and refine our knowledge and skills. Don't stop learning - your future will take twists and turns that cannot be predicted and you will find fulfillment in other parts of your life that are currently unimaginable.

Whatever lies ahead for you, I wish you the best of luck and hope that you will remember your years in this university fondly and with a sense that they were both happy and productive. As a member of IMU's alumni, you will always be part of the IMU family.

Finally I want to congratulate all of you who are today symbolically reaping the academic harvest of your deep commitment to learning. I wish you all the best in your professional career while once again reminding you that education is a lifelong experience. May you find success and fulfillment in all that you do and may you nurture and strengthen your ties with your alma mater and help it grow further in stature, as proud and loyal alumni of IMU. I wish you success in your future endeavors and best wishes to all of you for an exciting and rewarding future!
