PARTNER MEDICAL SCHOOLS IN THE
INTERNATIONAL MEDICAL CONSORTIUM

History of the IMU

The International Medical University (IMU) started as an exciting venture in medical education in 1991. A team of academicians led by Datuk Dr Kamal Salih, Dr Mei Ling Young, the late Dr Saidi Hashim with the help of Professor Ron Harden and Professor Ian Hart, two world-renowned medical educationists, conceptualised the International Medical College (IMC). Professor Ong Kok Hai joined the team later. This was a unique educational venture established in line with the Malaysian government's objective of making the country a leading centre of educational excellence in the region and providing more Malaysian students the opportunity to achieve their aspirations to become doctors and healthcare professionals.

Datuk Dr Kamal Salih

Dr Mei Ling Young

The Late Dr Saidi Hashim

The calibre of the medical educationists and the reputation of the Board of Governors initially helped lend credibility to the project. But it was the progressive, systems based, and integrated medical curriculum that caught the imagination of the Partner Medical Schools (PMS), which wanted to participate in this innovative although somewhat daring project. After 2½ years of study in the IMC, students would be able to springboard to any of the reputable PMS in the United Kingdom and Ireland, New Zealand, Canada, the United States and Australia and receive the degree from the respective university.

The College was officially launched on 13 April 1992 by the then Malaysia's Education Minister, YB Datuk Amar Dr Sulaiman Haji Daud in Kuala Lumpur.

This was a pioneering effort involving a private medical training institution representing a totally new and innovative concept of international partnership for the twenty-first century. The IMC had the full support of the Ministry of Education and Ministry of Health. The institution also had the support of experienced and reputable members of the Board of Governors and members of the Academic Council which consisted of the Deans or their representatives from all the PMS which met at least once a year. With the help of Professor Ron Harden and Professor Ian Hart, an international search for the Foundation Dean started in 1992. An eminent Professor of Pathology, Emeritus Professor John S Beck from the University of Dundee was appointed the Foundation Dean of the IMC. Sir Patrick Forrest, Emeritus Professor of Surgery from the University of Edinburgh joined

as the Associate Dean later. In 1993, the IMC took in its pioneer batch of 75 medical students.

In 1996, after the medical curriculum had run its full course and consolidated, the IMC felt it was timely to start a collaborative pharmacy programme with the University of Strathclyde, in response to the acute need of pharmacists in Malaysia. In 1998, the pioneer class of medical and pharmacy students graduated from the Partner Universities.

On 4 February 1999, the IMC was granted university status and became the International Medical University (IMU), thus providing an additional option for students to read the whole medical degree in Malaysia, the MBBS (IMU). The IMU Clinical School in Seremban took in its first cohort of 46 students in September 1999. The late YABhg Tun Dr Mohamed Zahir Haji Ismail, Speaker of the House of Representatives became IMU's first Chancellor.

As the student population grew, the IMU moved from its campus in Petaling Jaya to a new and larger campus in Bukit Jalil on 1 January 2000. More PMS, particularly in Australasia and the United Kingdom then joined our consortium. Having established a reputation as a premier private medical university with high calibre international connections, the IMU strives to innovate in medically-related education by developing novel curricula, new ways of delivery and assessment.

Since 1999, the University's growth and development has been in developing clinical schools in Seremban and Batu Pahat, and in establishing research as a core activity, together with development of postgraduate research Masters and PhD programmes. In 2004, we introduced our own Honours degree course in Pharmacy. The Honours degree course in Nursing was introduced in 2005. In February 2008, the degree course in Dentistry was introduced. Five other Honours degree courses in Nutrition & Dietetics, Medical Biotechnology, Psychology, Biomedical Science and in Pharmaceutical Chemistry commenced in July 2008. In 2009, we introduced a new programme Bachelor of Nursing Science (Hons), a programme targeted solely for registered nurses to upgrade their qualification from diploma level to a degree level.

To remain the premier private medical university, the IMU must develop quality programmes and services of an international standard.

The mace is the symbol of authority of the International Medical University (IMU). The globe at the top symbolises the international nature of the University. Gold denotes the quality of education provided by the IMU. The seven kris (traditional Malay weapon) represent the nations participating in the International Medical Consortium. The songket motif symbolises the country's cultural tradition. The bunga raya (hibiscus) is Malaysia's national flower. The five facets of the mace signify the five continents of the world.

The University Mace

The second ring consists of the logo of the IMU to signify its new charter as a University. Below the second ring of the mace are the logos of the original five Partner Medical Schools which helped start this innovative medical programme.

The original International Medical College emblems are etched on each side of the brace in the third ring of the mace. Below the third ring are the logos of the international Partner Universities involved through their medical schools in the International Medical Consortium. The bottom part of the mace is carved in the shape of the Kelantanese gasing (spinning top), another symbol of Malaysian culture.

IMU Vision

IMU shall be an innovative global centre of excellence in learning and research, supporting a community of scholars and professionals committed to serving society, promoting the development of students to reach their true potential in becoming competent, ethical, caring and inquiring citizens and visionary leaders.

IMU is committed to academic freedom and the principles of equal opportunity in the pursuit and application of knowledge, the highest standards of intellectual, educational and research productivity, and the establishment of a learning organisation that respects the individual.

IMU ~ A Unique International Vision

IMU offers a unique global opportunity for medicine and health sciences professional education. The pre-clinical course delivered in IMU, Kuala Lumpur leads into the clinical course offered at IMU and 30 partner International Research-intensive Universities. The quality of these universities assures the standing of the curriculum in IMU through the Academic Council.

IMU Quality Policy

The International Medical University aims to be an innovative centre of excellence in learning and research, producing competent, caring and ethical professionals who are lifelong learners. It is committed to achieving the highest standards of intellectual, educational and research productivity.

Together, Learning for Health

The Logo

The initials IMU represent the name of the University. The strips on the “I” represent the three pillars of Innovation, Imagination and Insight. The snake and staff are the traditional symbols for medicine, which is the educational focus of the University. The colour white represents integrity. The globe stands for international connections: the IMU as a member of the International Medical Consortium, both in terms of partnerships with many well-known foreign universities, as well as its international faculty and student body. The tilted square represents the mortarboard, which is the symbol of academia

in relation to the community. The colour blue, in its two shades, stands for peace and harmony.

The Motto

“*Together, Learning for Health*” is the IMU motto. The search for knowledge is a lifelong process. With the explosion in information, the growth of enabling technologies such as Information and Communications Technology and the globalisation of education, learning and discovery increasingly involve the sharing of resources and knowledge amongst communities of practice.

Message from the President

Convocation celebrates the achievements of a university's graduates and the pride of those who have supported them in their studies - family, friends and the university's faculty members who have accompanied these graduates on this long journey towards getting their degree.

As graduates, you will be receiving your final degree in your field today, a testimony that you have worked hard through late nights and early mornings, persisted and excelled. Today is the most deserved celebration for all of you. I would like to take this opportunity to offer my heartiest congratulations to the graduating students of our Master of Science, medical, medical sciences and pharmacy programmes as well as the convocating medical and pharmacy students.

It has been ten years since we started the MBBS (IMU) and our Clinical School in Seremban. In conjunction with its 10th Year Anniversary Celebrations, various activities will be held from 5 to 10 October 2009. These activities include exhibitions, sporting events, cultural events as well as health screening and awareness campaigns. Staff, students and alumnus of IMU and staff of the Ministry of Health (Hospital Tuanku Ja'afar, Hospital Port Dickson, Hospital Tuanku Ampuan Najihah, Hospital Batu Pahat and health clinics) will participate in these activities. The highlight of the celebrations will be a dinner and show on 10 October 2009 at the Clinical School in Seremban.

In 2008, Ministry of Health (MOH) sanctioned the use of Hospital Tuanku Ampuan Najihah (HTAN) in Kuala Pilah, Negeri Sembilan as an additional teaching hospital for the IMU. The university has already started to utilise the hospital for teaching and some faculty members have been providing services to this hospital.

The training of appropriate manpower for industries and the workplace is important for university graduates. In order to fulfill this role, universities would need to collaborate with relevant industries and establishments if they are to deliver appropriately trained manpower. The IMU is extremely conscious that its graduates should have a seamless transfer into the workplace. Towards this end, the IMU has and will continue to seek appropriate industrial partners who can contribute to this important process. To date, the IMU has already entered into agreements with BP Labs, Back to Health Malaysia and SRAS (or Satellite Reconnaissance Arresting Sickness) Berhad to be its industrial linkage partners.

An important milestone for IMU this year is the introduction of a new programme in April 2009, Bachelor of Nursing Science (Hons) (IMU). This flexible programme is targeted solely for registered nurses who wish to upgrade their professional qualification while they are working. For the undergraduate programmes, pharmacy, medical biotechnology, psychology, biomedical science and nutrition and dietetics

students now have an additional option to transfer their credits to overseas universities in Australia, New Zealand or United Kingdom. Another great development for our university which would reflect our commitment to meeting the needs of healthcare professionals in our region will be the introduction of Chiropractic and Traditional Chinese Medicine (TCM) programmes in the near future.

The university's commitment to our communities is also a very important part of its corporate initiative. Under its Community Social Responsibility programme, the university has adopted three villages, Kampung Tekir in Labu, Negeri Sembilan, Kampung Simpang Enam in Johor and Kampung Ulu Serendah in Selangor. As a responsible corporate and social citizen, the IMU, through its staff and students, has made several visits to these kampungs to provide health screening for its villagers. We are proud to note that the projects that are held in Batu Pahat is organised by the IMU students in Semester 10 in collaboration with Hospital Batu Pahat, health clinics of relevant districts and the local village organising committees.

In this joyous occasion, it is important for all of you to remember that you are very fortunate to have so many advantages when so many other people in Malaysia and around the world have so little. Each of you will have the opportunity to make a difference in this world. In making this difference, you will be faced with many difficult and confusing decisions and choices. It is important to do the right thing in the right way each and every time. This is a tall order, but one that I am confident the IMU graduates are capable of fulfilling, as a great university like IMU prepares its graduates well for the challenges ahead. You will all be aided by a solid foundation - your education at IMU. This foundation will have given you tremendous assets, the ability and desire to continue to learn and professional practice - skills, knowledge and virtues, that will serve you well throughout your lives.

It is hoped that you will continue to find fulfillment and success in the pursuit of your goals. Don't forget to pursue your lives with integrity, professionalism and a strong focus on community and family. Have a wonderful celebration today as IMU's latest graduates and newest alumni.

Congratulations once again on your well-deserved success and good luck in your future endeavours.
