# History of the IMU

The International Medical University (IMU) started as an exciting venture in medical education in 1991. A team of academicians led by Tan Sri Datuk Dr Kamal Salih, Dr Mei Ling Young, the late Dr Saidi Hashim with the help of Professor Ron Harden and Professor Ian Hart, two world-renowned medical educationists, conceptualised the International Medical College (IMC). Professor Ong Kok Hai joined the team later. This was a unique educational venture established in line with the Malaysian government's objective of making the country a leading centre of educational excellence in the region and providing more Malaysian students the opportunity to achieve their aspirations to become doctors and healthcare professionals.

Tan Sri Dr Kamal Salleh

Dr Mei Ling Young

The Late Dr Saidi Hashim

The calibre of the medical educationists and the reputation of the Board of Governors initially helped lend credibility to the project. But it was the progressive, systems based, and integrated medical curriculum that caught the imagination of the Partner Medical Schools (PMS), which wanted to participate in this innovative although somewhat daring project. After 2½ years of study in the IMC, students would be able to springboard to any of the reputable PMS in the United Kingdom and Ireland, New Zealand, Canada, the United States and Australia and receive the degree from the respective university.

The College was officially launched on 13 April 1992 by the then Malaysia's Education Minister, YB Datuk Amar Dr Sulaiman Haji Daud in Kuala Lumpur.

This was a pioneering effort involving a private medical training institution representing a totally new and innovative concept of

international partnership for the twenty-first century. The IMC had the full support of the Ministry of Education and Ministry of Health. The institution also had the support of experienced and reputable members of the Board of Governors and members of the Academic Council which consisted of the Deans or their representatives from all the PMS which met at least once a year. With the help of Professor Ron Harden and Professor Ian Hart, an international search for the Foundation Dean started in 1992. An eminent Professor of Pathology, Emeritus Professor John S Beck from the University of Dundee was appointed the Foundation Dean of the IMC. Sir Patrick Forrest, Emeritus Professor of Surgery from the University of Edinburgh joined as the Associate Dean later. In 1993, the IMC took in its pioneer batch of 75 medical students.

In 1996, after the medical curriculum had run its full course was consolidated, the IMC felt it was timely to start a collaborative pharmacy programme with the University of Strathclyde, the response to the acute need and demand for pharmacists in Malaysia. In 1998, the pioneer class of medical and pharmacy students graduated from the respective Partner Universities.

On 4 February 1999, the IMC was granted university status and became the International Medical University (IMU), thus providing an additional option for students to read the entire medical degree in Malaysia, the IMU MBBS programme. Our Clinical School in Seremban took in its first cohort of 46 students in September 1999. The late YABhg Tun Dr Mohamed Zahir Haji Ismail, Speaker of the House of Representatives became IMU's first Chancellor.

As the student population grew, the IMU moved from its campus in Petaling Jaya to a new and larger campus in Bukit Jalil on 1 January 2000. Many more Partner Medical School (PMS), particularly in Australasia and the United Kingdom joined our consortium. Having established a reputation as a premier private medical university with high calibre international connections, the IMU strives to innovate its medical education by developing novel curricula, new ways of delivery and assessment.

Since 1999, the University's growth and development has been in developing clinical schools in Seremban and Batu Pahat, and in establishing research as a core activity, together with development of postgraduate research for Masters and PhD programmes. In 2004, we introduced our own Honours

degree course in Pharmacy. The Honours degree course in Nursing was introduced in 2005. In February 2008, the degree course in Dentistry was introduced. Five other Honours degree courses in Nutrition & Dietetics, Medical Biotechnology, Psychology, Biomedical Science and in Pharmaceutical Chemistry commenced in July 2008.

Bachelor of Nursing Science (Hons) was introduced in 2009, a programme targeted solely for registered nurses to upgrade their qualification from diploma level to a degree level. In 2010, we introduced the Chiropractic programme, the first of its kind and only complete educational programme in Malaysia as well as in all of Southeast Asia. In addition, the Chinese Medicine programme was launched in February 2011. We believe our courses to be progressive and innovative, and we strive to use best practice standards in their delivery and assessment.

To remain the premier private medical university, the IMU must develop quality programmes and services of an international standard.

The mace is the symbol of authority of the International Medical University (IMU). The globe at the top symbolises the international nature of the University. Gold denotes the quality of education provided by the IMU. The seven kris (traditional Malay weapon) represent the nations participating in the International Medical Consortium. The songket motif symbolises the country's cultural tradition. The bunga raya (hibiscus) is Malaysia's national flower. The five facets of the mace signify the five continents of the world.

## The University Mace

The second ring consists of the logo of the IMU to signify its new charter as a University. Below the second ring of the mace are the logos of the original five Partner Medical Schools which helped start this innovative medical programme.

The original International Medical College emblems are etched on each side of the brace in the third ring of the mace. Below the third ring are the logos of the international Partner Universities involved through their medical schools in the International Medical Consortium. The bottom part of the mace is carved in the shape of the Kelantanese gasing (spinning top), another symbol of Malaysian culture.

# IMU Vision

IMU shall be an innovative global centre of excellence in learning and research, supporting a community of scholars and professionals committed to serving society, promoting the development of students to reach their true potential in becoming competent, ethical, caring and inquiring citizens and visionary leaders.

IMU is committed to academic freedom and the principles of equal opportunity in the pursuit and application of knowledge, the highest standards of intellectual, educational and research productivity, and the establishment of a learning organisation that respects the individual.

## IMU ~ A Unique International Vision

IMU offers a unique global opportunity for medicine and health sciences professional education. The pre-clinical course delivered in IMU, Kuala Lumpur leads into the clinical course offered at IMU and 30 partner International Research-intensive Universities. The quality of these universities assures the standing of the curriculum in IMU through the Academic Council.

## IMU Quality Policy

The International Medical University aims to be an innovative centre of excellence in learning and research, producing competent, caring and ethical professionals who are lifelong learners. It is committed to achieving the highest standards of intellectual, educational and research productivity.

*Together, Learning for Health*

### The Logo

The initials IMU represent the name of the University. The strips on the “I” represent the three pillars of Innovation, Imagination and Insight. The snake and staff are the traditional symbols for medicine, which is the educational focus of the University. The colour white represents integrity. The globe stands for international connections: the IMU as a member of the International Medical Consortium, both in terms of partnerships with many well-known foreign universities, as well as its international faculty and student body. The tilted square represents the mortar-board, which is the symbol of academia in relation to the community. The colour blue, in its two shades, stands for peace and harmony.

### The Motto

“*Together, Learning for Health*” is the IMU motto. The search for knowledge is a lifelong process. With the explosion in information, the growth of enabling technologies such as Information and Communications Technology and the globalisation of education, learning and discovery increasingly involve the sharing of resources and knowledge amongst communities of practice.

## Message from the President

Convocation is undoubtedly a day of celebration for all graduates as well as their parents. Graduates are full of optimism for a great future. It is also a day of recognition of great achievements where graduates move forward with confidence of a purposeful future. This special occasion is a day that all university students look forward to. Today graduates will be receiving their degrees or certificates of completion from our new Chancellor.

This is also a day marked by ceremonies and to welcome new faces. Today marks the installation of our new chancellor YBhg Dato Seri Dr T Devaraj as the university's third Chancellor. Today is indeed a special day. At a special ceremony, YBhg Dato' Dr Amir Abbas will also be installed as the Pro-Chancellor of the university. This installation will definitely strengthen the administration of IMU and bring the university to a higher level of academic excellence and international standing.

On behalf of the International Medical University, I wish to extend my heartfelt and warmest congratulations to you. All the successes that we recognise today are possible because of the culmination of years of hard work, late nights and perseverance. However, the credit is not yours alone. Credit must also go to your families and those who have supported you financially, emotionally and spiritually.

I am proud to announce that among those graduating today is a student who will be the first to graduate with a Bachelor of Nursing Science (Hons). This 2– year degree programme is very flexible and allows registered nurses with diplomas to upgrade their professional qualification through IMU while still working.

Graduates, the scrolls you receive today would be just a stepping stone for further personal career advancement. Regard it as the beginning of your achievements, and not the end. Always remember in a highly competitive working environment, only the committed and motivated survive. Your upward mobility will depend in large measure on your capacity for hard work with dedication being the vehicle which will propel you to the finishing line way ahead of others.

As you move ahead in life, you will have to find new strengths to realise your dreams. Think of the future with hope and expectations but with your feet firmly planted on the ground. Carry with you the courage of your convictions and the determination to succeed. More importantly, in climbing up the ladder of success, be mindful that you do not sacrifice such time-honoured virtues like honesty and integrity. At all times, bear in mind that the reputation of your alma mater depends on its graduates.

Life's lessons have no prepared texts; they are unpredictable and arise spontaneously requiring you to provide answers as situations confront you. As you traverse this turbulent course, there will be successes and failures, happiness and despair. It will not always be smooth sailing; there will be temptations and diversions which may temporarily distract you, but the same grit and determination which you employed to get to this point today will ensure achievement of your goals. Persevere, and do not be daunted by setbacks as steadfastness, determination and belief in yourself will lead inevitably to your success. Follow your dreams and make them a reality.

Graduates, while pursuing your respective careers, you must always remember to have a life outside your career. Take time to enjoy nice music, travel or do whatever that interests you. Use your skills to contribute to the community outside your work as this will bring its own satisfaction. All these things will make you a better person and you will benefit greatly from these experiences. You will then be able to return to your job each day refreshed and recharged, more able to achieve your full potential and thereby increase your contribution to society.

As much as you may rejoice at leaving us today, you will always be part of the IMU's family. The university will not forget you, your degree can never be dissolved, and even if either one of us would wish to sever our tie, it could not be done. You are joining the IMU alumni — a community of enormous diversity, intelligence, and creativity. As you grow and evolve in the coming years, please let us know where you are and what you are doing. We would like to stay in touch with you.

Finally, I would like to take this opportunity to wish you success in all your undertakings, great personal satisfaction, and happiness in your future endeavours.

YBhg Tan Sri Dato' Dr Abu Bakar Suleiman  
President
