A Brief History of IMU

22 years ago, it was clear that Malaysia was facing a serious shortage of doctors. Dr Kamal Salih, a visionary, and Dr Mei Ling Young, a social scientist with a strong interest in development, hit on a brilliant, simple idea – if young Malaysian students could not go out into the world to get the medical education they wanted and deserved, they would bring it to them.

And so the idea for the International Medical College (IMC) was born.

Kamal and Mei Ling roped in Dr Saidi Hashim, who had helped start the Universiti Sains Malaysia (USM)'s Medical School and Prof Ong Kok Hai, also a USM colleague, to help put the plan for the school together. They in turn invited two leading medical educationists – Prof Ron Harden and Prof Ian Hart to join the team.

The six of them then put together a unique model that would see medical students spend the first 5 semesters at the International Medical College (IMC) in Kuala Lumpur, before moving to any one of the Partner Medical Schools (PMS) around the world. It was a radical idea – a world's first – that changed the model for medical education. And in the process, helped build a better Malaysia.

The IMC curriculum was unique not just in its teaching and learning

methods, but also in the fact that it was designed to be universally accepted as a Phase 1 by some of the world's best medical schools. And its unique self-directed learning approach taught students to break away from teacher dependent learning and to be responsible for their own learning.

In November 1992 – after only 2 years of intense planning and with five leading PMS on board – the IMC opened its doors to students in Jalan Selangor, Petaling Jaya.

The college was officially launched on 13 April 1992 by the then Education Minister, YB Datuk Amar Dr Sulaiman Haji Daud, demonstrating the full support of the Malaysian Ministry of Education and Ministry of Health.

IMC Becomes the International Medical University

From 1992 to 1998, IMC focused on Phase 1 of its medical programme – the building of its Medical Sciences programme – so that Malaysian students could transfer seamlessly to the PMS. In 1995, IMC started two intakes, and by 1998, transferring approximately 68 students a year.

Everything changed dramatically, when in 1998, the Asian financial crisis struck. Fluctuating currencies and the massive depreciation of the Malaysian

ringgit hit both parents and the Malaysian government, as they had been sending students abroad to study medicine. The scale of uncertainties was unprecedented.

To overcome the problem of potentially stranded students from our Phase 1 programme, IMC quickly put into place a Phase 2 programme to be done locally. It was the IMU MBBS. The then Minister of Education, YB Dato Seri Mohd Najib Tun Razak, now Prime Minister of Malaysia, asked Kamal and Mei Ling to fast-track the setting up of IMC's Clinical School to help solve the problems of parents as well as the government-sponsored students. IMC was invited to become a university thereby being able to award its own degrees. IMU was born.

This had vast implications for IMC – upon completion of their Phase 1, students would have a choice to transfer to a PMS or to the Clinical School to complete their education locally.

Again, with the help of Prof Ron Harden and Prof Ian Hart, both who already had key roles in establishing the IMC, and senior medical deans Prof Michael Orme of the UK, Dr John Ruedy of North America and Prof Ian Simpson of New Zealand, collectively representing UK, North America and Australasia, the curriculum for Phase 2

and the physical design of the Clinical School were drawn up. A handful of clinicians, under the inspiring leadership of Prof John Joseph Bosco, (scheduled to be the Foundation Dean of the Clinical School), fleshed out the modern, innovative curriculum with eight outcomes, the Phase 2 curriculum. This curriculum incorporated the most forward-looking aspects of medical curricula.

The IMU Clinical School, comprising its curriculum, building and staff recruitment was completed in record time – just one year.

On 4 February 1999, IMC was granted university status and became the International Medical University (IMU), thus providing students the additional option of reading the whole medical degree in Malaysia, graduating with the IMU MBBS. With this, IMU also became the country's first private medical college to be upgraded to a university.

On 20 September 1999, the IMU Clinical School welcomed its first batch of 46 medical students. The School was located on the grounds of the Seremban Hospital, now Hospital Tuanku Ja'afar. In 2001, just 3 years after launching the programme, the IMU MBBS programme earned accreditation from the National Accreditation Board.

IMU then went on to establish teaching relationships with several other hospitals, the result of which was that IMU MBBS students were exposed, over the course of their degree, to the full spectrum of primary, secondary and tertiary care. The implementation of the "Senior Clerkship" programme when the student in their final semester behaves like a houseman is one of the distinguishing features of the IMU MBBS programme, and one that has

contributed significantly to the quality of the IMU medical graduate.

100% Medical and Healthcare Education Specialist

Well before the development of the IMU MBBS programme, the IMC was already exploring ways in which it could expand its healthcare education offering.

It introduced a twinned Pharmacy programme with University of Strathclyde in 1996, its own Bachelor of Pharmacy programme in 2004 and dentistry in 2008, which follow the IMU's unique model – a shared Phase 1 programme, with the option to complete their degree in IMU, or continue to any of their Partner Schools around the world.

Believing that health is holistic, IMU introduced the Chiropractic programme in 2010, the first of its kind in Southeast Asia. The IMU Chiropractic programme features an evidence-based curriculum, meaning the material that is taught is derived from research findings as much as possible.

IMU then introduced the Chinese Medicine programme in February 2011, where students are required to learn the basic medical sciences alongside clinical practices of Chinese Medicine. This integration is important as it combines the best of both types of medicine; students adopt and apply a scientific and an evidence-based approach to Chinese Medicine.

Completing its offering of medical and healthcare programmes are other clinically-based health professions like Nursing, Dietetics with Nutrition, and Psychology as well as non-clinical health programmes such as Medical Biotechnology, Biomedical Science, Nutrition and Pharmaceutical Chemistry.

Since 2004, IMU has been offering postgraduate programmes, their MSc and PhD by research. And in September 2011, IMU welcomed the pioneer batch of students enrolled in the first postgraduate taught programme in IMU, the MSc in Public Health. Besides this programme, other postgraduate programme offered are MSc in Analytical and Pharmaceutical Chemistry, Master of Formulation Science and MSc in Molecular Medicine.

Despite the variety, the different programmes share the same philosophy – to produce thinking students who are lifelong learners. IMU seeks to widen access to healthcare education, with courses that are both progressive and innovative. Its aim: to grow into a centre of healthcare educational excellence in the Asia-Pacific region.

Moving Into Healthcare

In January 2010, IMU took a bold step in its plan to be a holistic healthcare provider, with the opening of the IMU Oral Health Centre. This marked a major breakthrough for the University – for the very first time, IMU was receiving and treating real patients.

This was quickly followed by the opening of the IMU Chiropractic Centre in May 2010, the IMU Medical Clinic in July 2010 and the IMU Chinese Medicine Centre in November 2010.

Together, the four clinics form the IMU Healthcare Centre, which is unique in that it brings the disciplines of allopathic (western) medicine under one roof beside those of traditional and complementary medicine, offering western medicine, dental services, nutrition and dietary and psychological advice, alongside chiropractic and Chinese medicine services.

1

- 1 The International Medical College was officially launched on 13 April 1992.
- 2 In 1993, the pioneer batch of 75 students were enrolled in the medical programme.
- 3 On 20 April 1998, IMU received an invitation to become a university.
- 4 The pioneer batch of 30 students was enrolled in the IMU Chiropractic programme on 22 February 2010.
- 5 IMU Healthcare offers Chiropractic and Chinese Medicine, Dental and Medical services as well as Psychological, Nutritional and Dietary advice and counselling.
- 6 The IMU MSc in Public Health – the first ever postgraduate programme in Public Health offered by a private university – received its pioneer batch of students on 5 September 2011.

The Healthcare Centre serves as a teaching site for IMU students, and plays an important role in educating future healthcare professionals who understand the importance and benefits of offering holistic healthcare services. It also allows IMU to extend the learning experience, beyond that already offered by its partnerships with Ministry of Health hospitals and clinics, and helps attract quality faculty. It is both a teaching and service innovation.

Research Focused on Medicine and Medical Education

Moving into research was a natural progression in the evolution of the IMU in its continual quest for academic excellence. IMU thrust areas for research are: environmental health, cancer biology, stem cell research, active biomolecules and cellular mechanisms, pharmaceuticals and drug delivery systems, and natural compounds and nutraceuticals.

While medical and healthcare-related research continues to be an area of focus, IMU is also making progress in a new area of research – that of medical education.

Since 2000, when research activities first started, IMU has initiated 947 research projects, consisting of a mix of undergraduate, graduate and faculty research. From 2008 – 2011, it published 568 papers, of which 281 (49.5%) were in ISI papers. These were in respected journals such as the Lancet, British Medical Journal, Cochrane Data Base Systematic Reviews, Human Pathology, to name a few.

IMU's research efforts are further enhanced when its Institute of Research, Development and Innovation (IRDI) came onstream in 2012, which will elevate the University

as a significant player in biomedical and clinical research.

An Engaged University

One of IMU's core values is that to be good healthcare professionals, students must be moulded to be good human beings. And this includes being aware of, and sensitive to, the needs of the communities in which they live and work, hence IMU's tradition of active community engagement.

Through a comprehensive community engagement programme, students, faculty and staff work with local communities, particularly those in need, to build therapeutic relationships, share healthcare knowledge through treatment and counsel and run educational programmes. Amongst these are IMU's long-running "Kampung Angkat" (village adoption) programme, its "Health and Wellness Programme", its IMU Cares programmes and its regular Health Awareness Days.

Looking Forward

Today IMU is an integrated medical and healthcare institution, offering education, healthcare and research in partnership with some of the world's most respected individuals and universities in the field of medicine and healthcare. It is Malaysia's only university focused a hundred percent on medical and healthcare education, and continues to play a significant role in nation-building.

It has remained focused on the central philosophy that guided its founders – access to quality medical education, innovation and imagination as its cornerstone, and continuous reflection leading to insight to guide IMU into the future.

Its success stems from a lot of hard

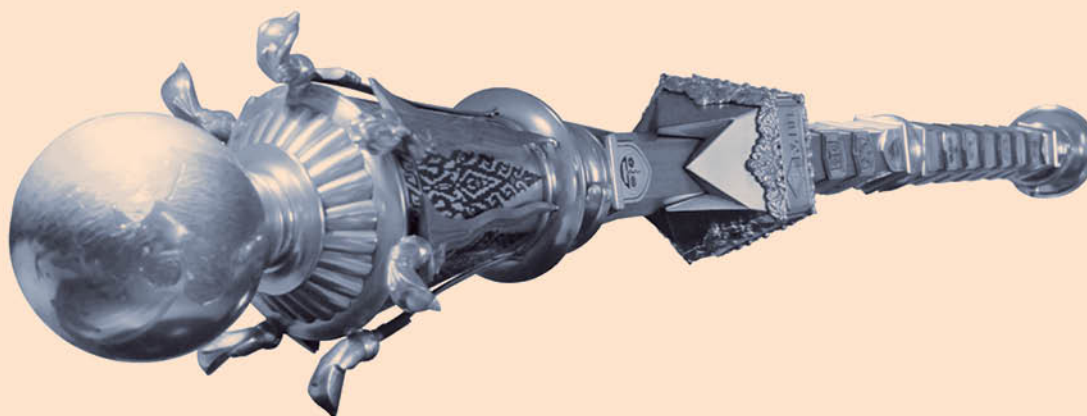

work, and the belief that everything that IMU does must draw from its core ethos of Innovation, Imagination and Insight. Innovation, to be creative and productive and to be focused on continuous innovation, Imagination to be realistic about what can be achieved and measured, and Insight to be focused on productivity and responsiveness, to be acceptable to those IMU serves.

In January 2011, IMU launched its 5-year Strategic Plan – ASPIRE, which will see the University work towards becoming a truly Learning Organisation, as envisaged by Peter Senge.

Forging ahead, IMU will have to develop an academic health centre where all the three components of education, research and healthcare will add value to each other. This will also differentiate IMU.

As it celebrates its 22nd Anniversary, IMU continues to be focused on its most important role – to help mould individuals to be better people, and to be better medical and healthcare professionals.

The University Mace

The mace is the symbol of authority of the International Medical University (IMU). The globe at the top symbolises the international nature of the University. Gold denotes the quality of education provided by the IMU.

The seven kris (traditional Malay weapon) represent the nations participating in the International Medical Consortium. The songket motif symbolises the country's cultural tradition. The bunga raya (hibiscus)

is Malaysia's national flower. The five facets of the mace signify the five continents of the world.

The second ring consists of the logo of the IMU to signify its new charter as a University. Below the second ring of the mace are the logos of the original five Partner Medical Schools which helped start this innovative medical programme.

The original International Medical College emblems are etched on each side of the brace in the third ring of the mace. Below the third ring are the logos of the international Partner Universities involved through their medical schools in the International Medical Consortium. The bottom part of the mace is carved in the shape of the Kelantanese gasing (spinning top), another symbol of Malaysian culture.

Our Vision

IMU shall be an innovative global centre of excellence in learning and research, supporting a community of scholars and professionals committed to serving society, promoting the development of students to reach their true potential in becoming competent, ethical, caring and inquiring citizens; and visionary leaders.

IMU is committed to academic freedom and the principles of equal opportunity in the pursuit and application of knowledge, the highest standards of intellectual, educational and research productivity; and the establishment of a learning organisation that respects the individual.

Our Quality Policy

IMU aims to be an innovative centre of excellence in learning and research, producing competent, caring and ethical professionals who are lifelong learners. It is committed to achieving the highest standards of intellectual, educational and research productivity.

Our Logo

The initials IMU represent the name of the University. The strips on the "I" represent the three pillars of Innovation, Imagination and Insight. The snake and staff are the traditional symbols for medicine, which is the educational focus of the University. The colour white represents integrity. The globe stands for international connections: the IMU as a member of the International Medical Consortium, both in terms of partnerships with many well-known foreign universities, as well as its international faculty and student body. The tilted square represents the mortarboard, which is the symbol of academia in relation to the community. The colour blue, in its two shades, stands for peace and harmony.

Message from the President

YBhg Tan Sri Dato' Dr Abu Bakar Suleiman

MDBS (Monash), MMed (S'pore), DMedSc (UKM), DSc Hon (UPM), PhD Hon (UMS),
FRACP, FAMM, FAMS, FACP (Hon), FRCP, FRCPE, FRCP (Glasgow), FRCPI, FRCSI (Hon),
FRCSE (Hon), FAFPM, FASc, AMP (Harvard)

Congratulations to our graduates on their convocation!

On behalf of the International Medical University, I would like to congratulate all the graduates, IMU's newest alumni. Among these graduates today is Ms Lim Hui Hui who has done the University proud by winning the Best Clinical Case Presentation Competition at the 20th Malaysian Dietitians' Association (MDA) National Conference in June 2014. A special congratulations goes to the first cohort of Master of Science in Analytical and Pharmaceutical Chemistry graduates.

This graduation promises to be an exciting time as we celebrate the accomplishments of our graduates from four of our Schools in the Faculty of Health and Medicine. This is the time for us to take pride in our students' accomplishments and congratulate them on a job well done. The feeling of pride is also shared by those who have given support to these graduates during the challenging yet rewarding time at the University: parents, spouses, children and friends.

The degree programmes that these graduates are graduating with today represent an array of academic disciplines in healthcare. Graduates of this University are unique as they will have the opportunity to enrich the lives of those around them regardless of what their chosen profession is. As they embark upon and progress through their careers, they should always remember the reason they

chose their respective fields: to make meaningful contributions to our communities, our country, and internationally. This can be done by serving these communities and improving the quality of life and health of its members professionally and with compassion, honesty and integrity.

Medical teaching has been a cornerstone of our curriculum since we opened our doors in 1992. A very important aspect is its collaborations with world-class partner institutions of higher learning. Over the years, the number of institutions have increased. This year sees the addition of University of Wollongong from Australia and University of Exeter from UK into IMU's expanding network of Partner Universities, providing additional credit transfer options to the University's medical students. This is another feather to IMU's cap and is part of its ongoing mission to train and promote excellence in the healthcare industry.

Research is important in a university. This year, I am proud that the researchers from this University have secured a total of RM 1,041,530 in grants under the Fundamental Research Grant Scheme (FRGS). With the award of the grants, I am confident that the researchers will contribute to fulfilling the nation's aspirations to excel in fundamental research.

Graduates, in the coming years, you should not forget this University. I encourage you to give back to the University by supporting the alumni activities and keeping us updated on the many achievements you are experiencing in your lives. The University will always take great pride of your achievements, no matter how small it is.

Congratulations once again to our graduates. We wish them all very best as they embark on their journey beyond IMU.
