

Waters Corporation

Since 1958, Waters Corporation has been in the business of making innovative analytical instruments that assist scientists in reaching their scientific goals, increase productivity, and earn laboratory-based organizations a higher return on their investments in research, development, and quality control.

Whether at work discovering new pharmaceuticals, inventing new and more effective ways to treat diseases, assuring the safety of the world's food and drinking water supplies, monitoring and controlling pollution, or conserving the world's greatest art treasures, scientists worldwide rely on Waters liquid chromatography and mass spectrometry products.

With 60 years of research and development of specialty measurement instrumentation, Waters LC-MS, chemistries, informatics, and thermal analysis innovations help pharmaceutical and biopharmaceutical companies efficiently accelerate and improve workflows. We've honed our scientific expertise to help you move molecules from discovery, development, and manufacturing through commercialization. Our deep understanding of the global pharmaceutical industry, combined with our advanced analytical technologies, help bring critical medicines to patients quickly, safely, and effectively.
